

**Post ORID Session Survey of Students  
Student Responses**

**What could have been better? (N=15)**

I think it would be more beneficial to us to understand why we are changing the set up of our CTT meetings in the first place. I don't think many of us were clear on that aspect. I think our CTT meetings are ran smoothly and are helpful to us as students. I understand that the information we gave in the beginning of the semester highlighted our weaknesses in the area of facilitating, but I think the ORID approach is too involved for how our CTT meetings are run. It is a time where we can relax and have a meeting that isn't stressful and it can still be beneficial.
It would have been better if the different catagories of ORID were more fully explained. I wish that someone would have explained how to transition smoothly between the different catagories of questions.
I think it would be an improvement to have this type of instruction closer to the beginning of the semester to give everyone a chance to facilitate a meeting in this way. Specifically I have no suggestions...the presentation was very helpful.
If this is the way that the teams are expected to be run, then it would be helpful to address this information in the beginning of the semester so that we can improve our leadership skills.
A discussion on wether we (as students) feel our CTTeam Meetings are most effective with more or less structure.
